The issue with this reverse should have a radiate head. The issue is not known for an AE as which would be expected with a laureate head. That this issue is of a weight on the heavier side of an expected dupondius confirms the issue as a dupondius. Consequently for any denomination it is unpublished with a laureate head.

In the sale of the Bickford-Smith Collection lot 1766 illustrates the style of this mint for an example of this type. In the Reka Devnia hoard containing 3,409 examples of Julia Domna there were no examples noted for this type. They were probably confused with the similar issues from Rome mint.
