\$180

part

2014*
South East Asia, interrupted dumbbell ring lead coinage, issued A.D. 200-600, (10-14 grams), together with a silver interrupted ring (9.1 grams), with inscribed crescents, (cf.M.2610-1 and 5321-2; Mitchiner 11-12 [p.30, History and Coinage of South East Asia until the fifteenth century]). *Surface oxidation, otherwise very fine and unusual.* (6)

\$300

Mitchiner (p.29 cited above) notes that finds of similar types as these as well as moulds were found at Oc-ao by Malleret's excavations (1959-1963) as well as contemporary Mon sites in Thailand and the Pyu site of Beikthano in the Irrawaddy valley. These are all dated to the period A.D. 200-600. Consequently the circulation of these pieces must have covered from South Vietnam, Thailand and Burma. He notes most examples are 20-30 grams but a few specimens have been observed around 50 grams. The analysis of these "dumbbell interrupted rings" show that they are almost 100% lead. The style of these dumbbells are somewhat different to those illustrated by Mitchiner.

2015*
Southern Rhodesia, proof set, penny - halfcrown, 1937. *FDC and rare.*

\$3,250
